

CampusCore

BUILDING UNITY | FOSTERING GROWTH

01

Introduction

Introduction

CampusCore is a modern online platform designed for colleges to make learning and management simple and effective.

It brings students, teachers, and administrators together on one platform for better communication and coordination.

The platform helps students access learning resources, complete their work online, and stay updated with academic activities.

Teachers can easily manage their classes, share knowledge, and guide students in a structured way.

The system also includes features like attendance tracking, notifications, and a points-based reward system to keep students motivated.

Overall, CampusCore creates a smooth and improved digital learning environment for everyone.

02

Project Definition

Project Definition

- CampusCore is a web-based academic management system developed using the MERN stack.
 - The platform is designed to digitally manage learning activities and academic data in a centralized system.
 - It provides three main dashboards: Admin, Teacher, and Student, each with specific functionalities.
- 
- 

- 
- 
- 
- 
- The system allows teachers to share study materials, create quizzes, and review assignments submitted by students.
 - Students can participate in quizzes, submit assignments online, track attendance, and earn points for completing activities.
 - CampusCore improves communication, organization, and efficiency in managing campus academic processes.

03

Project Profile

Project Profile

Project Title

- CampusCore – Smart Campus Learning & Management System

Project Type

- Web-based academic management platform

Technology Used

- MongoDB – Database
- Express.js – Backend framework
- React – Frontend interface
- Node.js – Server environment

Users

- Admin
- Teacher
- Student

Purpose

- Manage academic activities digitally
- Provide a centralized learning platform
- Improve communication between students and teachers
- Track student progress and performance

Platform

- Accessible through web browser on desktop or mobile
- 

Key Features

- Study material upload and download
- Assignment creation and submission
- Quiz system with instant results
- Attendance tracking
- Digital student ID card generation
- Reward points and leaderboard system

Goal

- To create a smart and interactive digital campus environment.

Modules

Modules

Admin

- Manage students and teachers
- Add and manage subjects
- Monitor assignments and quizzes
- View system statistics and reports

Teacher

- Upload study materials (PDF, notes, PPT)
- Create assignments and set deadlines
- Create quizzes and add questions
- Check student submissions and results
- Mark student attendance

Student

- View and download study materials
- Submit assignments online
- Attempt quizzes and view results
- Check attendance and academic progress
- Earn reward points and unlock learning resources

Authentication

- User login and registration system
- Role-based access (Admin, Teacher, Student)
- Secure authentication using tokens

Reward & Points

- Students earn points by completing activities
- Points can unlock special study materials or quizzes
- Leaderboard to show top performing students

Quiz Module

- Teacher can create quizzes and add questions
 - Students can attempt quizzes online
 - System automatically shows quiz results and scores
-

Analysis

- Shows student performance statistics
- Displays quiz results and progress reports
- Helps teachers analyze student learning performance

File / Material Upload

- Teachers can upload study materials (PDF, DOC, PPT)
- Students can download learning resources anytime
- Helps in easy sharing of academic content

06

Advantages

**Centralized
System**

All academic activities like materials, quizzes, assignments, and fees are managed in one platform.

**Easy Access
to Study
Materials**

Students can download learning materials anytime.

**Online
Assignment
Submission**

Students can submit assignments digitally without physical paperwork.

**Quiz and
Performance
Tracking**

Teachers can evaluate student knowledge and track performance easily.

Attendance Management	Helps manage attendance records.
Student Progress Analysis	The analysis module helps teachers understand student performance through reports.
Time Saving	Reduces manual work for teachers and students.
Improved Communication	Teachers can easily share materials and updates with students.
