

CampusCore

Smart Campus Learning & Management System

Mini Project - I Report

Submitted as Partial Fulfilment of
Master of Computer Applications
Semester-II

Developed by

Anghan Urvish Jigneshbhai (Enrollment no. 202500719010003)

Patel Khushi Vipulbhai (Enrollment no. 202500719010035)

Patel Nisarg Ashishbhai (Enrollment no. 202500719010036)

Patel Ved Sanjaykumar (Enrollment no. 202500719010038)

Under Guidance of

Prof. Krupa Shah, FCAIT

Faculty of Computer Applications & Information Technology

GLS University

Ahmedabad-380 006

Certificate

This is to certify that

Anghan Urvish Jigneshbhai (Enrollment no. 202500719010003)

Patel Khushi Vipulbhai (Enrollment no. 202500719010035)

Patel Nisarg Ashishbhai (Enrollment no. 202500719010036)

Patel Ved Sanjaykumar (Enrollment no. 202500719010038)

Students of MCA semester II of
Faculty of Computer Applications & Information
Technology
GLS University

have successfully completed the Mini Project - I work entitled
***“CampusCore:- Smart Campus Learning & Management
System”***

as a partial fulfillment of the study of
Master of Computer Applications

(Prof. Krupa Shah)
Internal Guide

(Dr. Devarshi Mehta)
Project Coordinator

(Dr. Harshal Arolkar)
Head, PG Programme

17 April 2026

ACKNOWLEDGEMENT

We have taken efforts in this project however; it would not have been possible without the kind of support and help of many individuals. We would like to extend our sincere thanks to all of them.

We are highly indebted to faculties for their guidance and constant supervision as well as for providing necessary information regarding the project. We take this opportunity to thank all of our friends who provided extremely useful reviews and for their all-time support and help in every aspect of the course of the project presentation. We are grateful to our college, for providing us with all the required resources and a good working environment.

Finally, we would like to thank everyone who directly or indirectly helped us with this project. With thanks to all.

INTRODUCTION

In today's digital era, educational institutions are increasingly adopting technology to improve efficiency and enhance the learning experience. CampusCore is a modern web-based platform developed to simplify and streamline various academic and administrative activities within a college environment.

CampusCore is designed to bring students, teachers, and administrators on to a single unified platform, enabling smooth communication and better coordination among all users. The system eliminates traditional manual processes and replaces them with a more organized, digital approach.

For students, CampusCore provides easy access to study materials, assignments, notifications, and academic updates. It helps them stay informed and manage their academic responsibilities efficiently. Teachers can use the platform to upload study resources, create assignments and quizzes, track student performance, and manage attendance in a structured manner.

The system also includes essential features such as attendance tracking, real-time notifications, assignment management, quiz systems, and a points-based reward mechanism. These features not only improve transparency but also motivate students to actively participate in their learning process.

Administrators can efficiently manage users, assign roles, monitor activities, and maintain overall system control. This ensures smooth functioning of academic operations without unnecessary delays or confusion.

Overall, CampusCore aims to create a smart, efficient, and user-friendly digital learning environment that enhances productivity, saves time, and improves the overall educational experience for everyone involved.

PROJECT DEFINITION

CampusCore is a web-based academic management system developed using the MERN stack (MongoDB, Express.js, React.js, and Node.js). The system is designed to digitally manage academic activities and institutional data through a centralized and user-friendly platform.

The primary objective of CampusCore is to simplify and streamline campus operations by integrating students, teachers, and administrators into a single system. The platform is structured around three main dashboards — Admin, Teacher, and Student — each providing role-based access and functionalities tailored to the user's responsibilities.

The Admin dashboard enables efficient management of users, including adding students and teachers, assigning subjects, and controlling system access through activation and deactivation of accounts. The Teacher dashboard allows educators to upload study materials, create and manage assignments, conduct quizzes, and evaluate student submissions. It also helps teachers track student performance and maintain academic records.

The Student dashboard provides access to learning resources, allows submission of assignments, participation in quizzes, and tracking of attendance and academic progress. Additionally, the system includes a points-based reward mechanism that encourages students to stay engaged and actively participate in academic activities.

CampusCore enhances communication between users through notifications and updates, ensuring that all stakeholders remain informed about important academic events and deadlines. By digitizing and automating routine tasks, the system reduces manual workload, minimizes errors, and improves overall efficiency.

In conclusion, CampusCore serves as a comprehensive solution for managing academic processes in a modern, organized, and efficient manner, contributing to an improved digital learning environment.

PROJECT PROFILE

Project Name	CampusCore – Smart Campus Learning & Management System
Project Type	Web Application
Domain	Education Technology (EdTech)
Subject	Mini Project – I
Academic Institution	GLS University, Ahmedabad
Faculty	Faculty of Computer Applications & Information Technology
Programme	Master of Computer Applications (MCA) – Semester II
Academic Year	2026-27
Team Members	Patel Khushi, Patel Nisarg, Patel Ved, Anghan Urvish
Primary Technology	React.js, HTML, CSS, JavaScript
Backend	Node, Express
Development Tools	VS Code, GitHub

TOOLS AND TECHNOLOGY

The development of CampusCore is based on modern web technologies that ensure efficiency, scalability, and a user-friendly experience. The following tools and technologies were used in building the system:

- **Frontend Technologies**

1. **React.js**

React.js is used to build the user interface of the application. It helps in creating a dynamic and responsive design using reusable components. With React, the application provides a smooth and interactive experience for users without reloading the entire page.

2. **HTML**

HTML is used to structure the web pages of the application. It defines the layout and organizes content such as forms, buttons, and text displayed to users.

3. **CSS**

is used to design and style the application. It enhances the visual appearance by adding colors, layouts, spacing, and responsive design, making the interface attractive and user-friendly.

4. **JavaScript**

JavaScript is used to add interactivity and logic to the frontend. It helps in handling user actions, validating forms, and communicating with the backend server.

- **Backend Technologies**

1. **Node.js**

Node.js is used as the server-side runtime environment. It allows the application to handle multiple requests efficiently and ensures fast performance of backend operations.

2. Express.js

Express.js is a backend framework built on Node.js. It is used to create APIs, manage routes, and handle requests and responses between the frontend and the database.

- **Database**

1. MongoDB

MongoDB is a NoSQL database used to store application data such as user details, assignments, quizzes, and attendance records. It provides flexibility and scalability, making it suitable for handling large amounts of data.

- **Development Tools**

1. Visual Studio Code (VS Code)

VS Code is used as the primary code editor for developing the application. It provides features like syntax highlighting, debugging tools, and extensions that make coding faster and easier.

2. Git and GitHub

Git is used for version control, allowing developers to track changes in the code. GitHub is used to store the project repository online, making it easy to collaborate, manage versions, and maintain backup of the project.

FEASIBILITY STUDY

Feasibility Study

The feasibility study is an important step in system development that evaluates whether the proposed project is practical, achievable, and beneficial. It helps determine if the system can be successfully implemented within the given constraints. For CampusCore, the feasibility is analyzed in the following aspects:

1. Technical Feasibility

CampusCore is developed using modern and widely used technologies such as React.js, Node.js, Express.js, and MongoDB. These technologies are reliable, scalable, and suitable for building web-based applications.

The development tools like VS Code and GitHub are easily available and support efficient coding and version control. Since these technologies are well-documented and supported by a large community, the system is technically feasible to develop and maintain.

2. Economic Feasibility

The project is cost-effective as it uses open-source technologies, which reduces development and licensing costs. There is no need for expensive hardware or software.

The main investment is the time and effort required for development. Once implemented, the system helps reduce administrative costs by minimizing paperwork and manual processes. Therefore, the project is economically feasible.

3. Operational Feasibility

CampusCore is designed with a simple and user-friendly interface, making it easy for students, teachers, and administrators to use the system without extensive training.

The system improves daily academic operations such as attendance tracking, assignment submission, and communication. Users can quickly adapt to the platform, making it operationally feasible.

4. Time Feasibility

The project can be completed within the given academic timeline using proper planning and development strategies. The use of the MERN stack allows faster development and integration of different modules.

With efficient time management, the system can be developed, tested, and deployed successfully within the required time frame.

5. Legal Feasibility

CampusCore does not involve any illegal activities and follows standard data handling practices. User data such as student and teacher information is securely stored and managed.

The system ensures privacy and security, making it legally acceptable for use in educational institutions.

MODULES OF THE SYSTEM

System Modules

CampusCore is divided into several modules to ensure smooth functioning and proper management of academic activities. Each module is designed to perform specific tasks and provide role-based functionalities.

1. Admin Module

- The Admin module is responsible for managing the overall system and ensuring smooth operation of the platform.
- Key Functions:
 - Manage students and teachers (add, update, delete)
 - Add and manage subjects
 - Assign subjects to teachers
 - Monitor assignments and quizzes
 - View system statistics and reports
- The admin acts as the central authority, controlling access and maintaining system data.

2. Teacher Module

- The Teacher module allows educators to manage academic content and monitor student performance effectively.
- Key Functions:
 - Upload study materials (PDFs, notes, presentations)
 - Create assignments and set submission deadlines
 - Create quizzes and add questions
 - Evaluate student submissions and view results
 - Mark and manage student attendance
- This module helps teachers organize their teaching process in a structured and digital manner.

3. Student Module

- The Student module provides all necessary tools for students to participate in learning activities.
- Key Functions:
 - View and download study materials
 - Submit assignments online
 - Attempt quizzes and view results instantly
 - Check attendance and academic progress
 - Earn reward points for completing activities
- This module enhances the learning experience by providing easy access to all academic resources.

4. Authentication Module

- The Authentication module ensures secure access to the system.
- Key Functions:
 - User registration and login system
 - Role-based access control (Admin, Teacher, Student)
 - Secure authentication using tokens (e.g., JWT)
- This module protects user data and ensures that only authorized users can access specific features.

5. Reward & Points Module

- This module is designed to motivate students and encourage active participation.
- Key Functions:
 - Students earn points by completing tasks like quizzes and assignments
 - Points can be used to unlock special study materials or features
 - Leaderboard displays top-performing students
- This gamification approach increases student engagement and interest.

6. Quiz Module

- The Quiz module enables online assessment and instant evaluation.
- Key Functions:
 - Teachers can create quizzes and add multiple questions
 - Students can attempt quizzes online
 - Automatic evaluation and instant result display
- This module helps in quick and effective assessment of student knowledge.

7. Analysis Module

- The Analysis module provides insights into student performance.
- Key Functions:
 - Displays student performance statistics
 - Shows quiz results and progress reports
 - Helps teachers analyze learning patterns and improvement areas
- This module supports data-driven decision-making in education.

8. File / Material Upload Module

- This module handles the sharing of academic resources.
- Key Functions:
 - Teachers can upload study materials (PDF, DOC, PPT)
 - Students can download resources anytime
 - Ensures easy and centralized sharing of learning content
- This improves accessibility and reduces dependency on physical materials.

Conclusion of Modules

Each module in CampusCore is designed to perform a specific role, and together they create a complete and efficient academic management system. The modular approach ensures scalability, better maintenance, and a smooth user experience.

FEATURE OF THE SYSTEM

Features of the System

CampusCore is designed with a wide range of features that simplify academic management and enhance the overall learning experience. These features help in improving efficiency, communication, and accessibility within the institution.

1. Centralized Academic Management

The system provides a single platform to manage all academic activities such as study materials, assignments, quizzes, and attendance. This reduces confusion and ensures that all data is organized and easily accessible.

2. Study Material Upload and Download

Teachers can upload study materials like PDFs, documents, and presentations. Students can access and download these materials anytime, making learning flexible and convenient.

3. Assignment Management System

Teachers can create assignments and set submission deadlines. Students can submit their assignments online, and teachers can review and evaluate them efficiently.

4. Online Quiz System

CampusCore includes a quiz module where teachers can create quizzes with multiple questions. Students can attempt quizzes online and receive instant results, which helps in quick assessment.

5. Attendance Tracking

Teachers can mark attendance digitally, and students can view their attendance records at any time. This feature ensures accuracy and transparency in attendance management.

6. Role-Based Access Control

The system provides secure login and access control based on user roles (Admin, Teacher, Student). Each user can only access features relevant to their role.

7. Digital ID Card Generation

The system allows the generation of digital ID cards for students and teachers. This helps in easy identification and reduces the need for physical ID cards.

8. Reward Points System

Students earn reward points for completing activities like assignments and quizzes. This motivates them to actively participate in academic tasks.

9. Leaderboard System

A leaderboard displays top-performing students based on their points. This encourages healthy competition and improves student engagement.

10. Performance Analysis and Reports

The system provides detailed reports on student performance, quiz results, and academic progress. This helps teachers analyze and improve student learning outcomes.

11. Notifications and Updates

CampusCore sends notifications regarding assignments, quizzes, and important announcements. This keeps all users informed and updated.

12. User-Friendly Interface

The system is designed with a simple and attractive interface, making it easy for all users to navigate and use the platform efficiently.

USERS OF THE SYSTEM

Users of the System

CampusCore includes three main types of users: Admin, Teacher, and Student. Each user has specific responsibilities and plays an important role in the system. The platform uses role-based access to ensure secure and efficient operation.

1. Admin

- The Admin is the main authority who manages and controls the entire system. This user ensures that all activities run smoothly and efficiently.
- Responsibilities:
 - Manage users (students and teachers)
 - Assign roles and permissions
 - Activate or deactivate user accounts
 - Upload and maintain student and teacher data
 - Generate digital ID cards
 - Configure system settings
 - Monitor system activities
 - View analytics and reports

2. Teacher

- Teachers are responsible for handling academic activities and guiding students through the learning process. They manage study content and evaluate student performance.
- Responsibilities:
 - Login to the system securely
 - Add and manage student details
 - Upload study materials (PDFs, notes, PPTs)
 - Create quizzes and add questions
 - Assign assignments with deadlines
 - Evaluate student submissions and performance
 - View reports and progress
 - Take and manage attendance

3. Student

- Students are the primary users of the system who use it for learning and tracking their academic progress. The system provides them with easy access to all learning resources.
- Responsibilities:
 - Login to the system
 - Access and download study materials
 - Submit assignments online
 - Attempt quizzes
 - View results and performance
 - Earn reward points
 - Track attendance and progress

ARCHITECTURE DIAGRAM

UML DIAGRAM

UML (Unified Modelling Language) diagrams provide a standardised way to visualise the design, structure, and behaviour of a software system. This section presents the key UML diagrams for TrueHire, including Class, Use Case, Sequence, and Activity diagrams.

DATABASE DESIGN

1. Admin_Details

Field Name	Datatype	Size	Constraints	Sample Value	Description
admin_id	INT	5	PRIMARY KEY	1	Unique identifier for administrator.
Username	VARCHAR	50	UNIQUE,NOT NULL	106743	Unique identification number / username.
password	VARCHAR	255	NOT NULL	admin@24	Encrypted password for administrator access (should be stored securely using hashing).

2. Student_details

Field Name	Datatype	Size	Constraints	Sample Value	Description
student_id	INT	5	PRIMARY KEY	1	Unique identifier for each student.
student_name	VARCHAR	100	NOT NULL	Nisarg Patel	Name of the student.
Enrollment	VARCHAR	20	NOT NULL	202500719010068	Unique enrollment number
student_contact	BIGINT	10	NOT NULL	6356874875	Student's contact phone number.
student_email	VARCHAR	150	NOT NULL	Student@gmail.com	Student's email address.
Course	VARCHAR	50	NOT NULL	MCA	Course name
Year	INT	4	NOT NULL	2	Academic year
student_password	VARCHAR	255	NOT NULL	year@2026	Password for secure login.
status	TINYINT	1	NOT NULL	1	1 = active, 0 = deactive

3. Teacher_details

Field Name	Datatype	Size	Constraints	Sample Value	Description
teacher_id	INT	5	PRIMARY KEY	1	Each have id to identify uniquely
teacher_name	VARCHAR	100	NOT NULL	Urvish Anghan	Name of teacher
id_no	VARCHAR	20	UNIQUE,NOT NULL	110051	ID for teacher
teacher_contact	BIGINT	10	NOT NULL	6353660817	Contact details of teacher
designation	ENUM	--	NOT NULL	Senior Teacher	Designation (post) of teacher
Qualification	VARCHAR	100	NOT NULL	PHD M.TECH	Teacher qualification
date_of_joining	DATE	--	NOT NULL	3/01/2022	Date when teacher join institute
email	VARCHAR	150	UNIQUE,NOT NULL	teacher01@gmail.com	Email id of teacher
status	TINYINT	1	NOT NULL	1	1 = active, 0 = deactive
teacher_password	VARCHAR	255	NOT NULL	teacher@123	Teachers password for secure login

4. Subject's

Field Name	Datatype	Size	Constraints	Sample Value	Description
subject_code	VARCHAR	10	PRIMARY KEY	SC1204	Unique code for each subject
subject_name	VARCHAR	100	NOT NULL	Machine learning	Full name of the subject
Course	VARCHAR	50	NOT NULL	MCA	Course name
year	INT	4	NOT NULL	2	Academic year

5. Subject_allocation

Field Name	Datatype	Size	Constraints	Sample Value	Description
subject_allocation_id	INT	5	PRIMARY KEY	1	UNIQUE KEY generate of subject allocation
teacher_id	INT	5	FOREIGN KEY	1	Foreign key for teacher table
subject_code	VARCHAR	10	FOREIGN KEY	SC1204	Foreign key from subject table

6. Study Material Details

Field Name	Datatype	Size	Constraints	Sample Value	Description
study_material_id	INT	5	PRIMARY KEY	2	Subject material id for each subject
subject_code	VARCHAR	10	FOREIGN KEY	SC1204	FOREIGN KEY from subjects table
file_title	VARCHAR	100	NOT NULL	video test	File title for subject materials
description	TEXT	--	NOT NULL	this is description...	Descriptions for subject materials
file_path	VARCHAR	255	NOT NULL	upload/file.mp4	File path of subject materials
Uploaded_By	INT	--	FOREIGN KEY	1	Teacher id
Upload_date	DATETIME	--	NOT NULL	2026-04-08 11:30:00	Date of material uploaded

7. assignment_details

Field Name	Datatype	Size	Constraints	Sample Value	Description
assignment_details_id	INT	5	PRIMARY KEY	10	Unique identifier for each assignment.
subject_code	VARCHAR	10	FOREIGN KEY	SC1204	Foreign key from subject table
Teacher_id	INT	5	FOREIGN KEY	1	Foreign key for teacher table
assignment_title	VARCHAR	100	NOT NULL	assignment -1	Brief title of the assignment.
Description	TEXT	--	NOT NULL	Understand...	Detailed description and objectives.
due_date	DATETIME	--	NOT NULL	24/10/2026 10:59:00	Deadline for submission.
file_path	VARCHAR	255	NOT NULL	abcd/efg.pdf	Path to assignment PDF document.

8. assignment_submit

Field Name	Datatype	Size	Constraints	Sample Value	Description
Submission_id	INT	5	PRIMARY KEY	1	Unique identifier for each submission.
assignment_details_id	INT	5	FOREIGN KEY	10	Linking submission to specific assignment.
Student_ID	INT	5	FOREIGN KEY	201	Student reference
file_path	VARCHAR	255	NOT NULL	abcd/efg.pdf	Path to submitted assignment file.
submitted_at	DATETIME	--	NOT NULL	19/10/2026 12:15:00	Assignment submission date
Remark	VARCHAR	100	NOT NULL	Good	Remarks given by teacher

9. Attendance

Field Name	Datatype	Size	Constraints	Sample Value	Description
attendance_id	INT	5	PRIMARY KEY	1	Unique identifier for attendance record.
student_id	INT	5	FOREIGN KEY	5	ID of the student.
subject_code	VARCHAR	10	FOREIGN KEY	SC1204	Foreign key from subject table
date	DATE	--	NOT NULL	20/07/2026	Date of recording attendance
status	ENUM	--	NOT NULL	Absent	Status: 'Present' or 'Absent'

10.Attendance

Field Name	Datatype	Size	Constraints	Sample Value	Description
Reward_ID	INT	5	PRIMARY KEY	1001	Unique rewards id
Student_id	INT	5	FOREIGN KEY	1	Student reference
Points	INT	5	NOT NULL	500	Rewards points
Badge	VARCHAR	50	NOT NULL	TOP performer	Achievement badge

11.Quiz

Field Name	Datatype	Size	Constraints	Sample Value	Description
Quiz_id	INT	5	PRIMARY KEY	100	Unique quiz id
Title	VARCHAR	100	NOT NULL	ML QUIZ	Quiz title
teacher_id	INT	5	FOREIGN KEY	1	Foreign key for teacher table
Student_id	VARCHAR	10	FOREIGN KEY	1	Student reference
Total_marks	INT	5	NOT NULL	20	Quiz marks
Duration	INT	--	NOT NULL	30	Duration in minutes
Date	DATE	--	NOT NULL	2026-04-12	Quiz date

12. Quiz Question

Field Name	Datatype	Size	Constraints	Sample Value	Description
Question_ID	INT	5	PRIMARY KEY	1001	Unique question ID
Quiz_ID	INT	5	FOREIGN KEY	701	Quiz reference
Question_Text	TEXT	--	NOT NULL	What is DBMS?	Question content
Marks	INT	3	NOT NULL	5	Marks for question
Question_Type	VARCHAR	20	NOT NULL	MCQ	MCQ / TRUE_FALSE / TEXT

13. Quiz Question options

Field Name	Datatype	Size	Constraints	Sample Value	Description
Option_ID	INT	5	PRIMARY KEY	2001	Unique option ID
Question_ID	INT	5	FOREIGN KEY	1001	Question reference
Option_Text	VARCHAR	255	NOT NULL	Database	Option text
Is_Correct	BOOLEAN	--	NOT NULL	TRUE	Correct answer flag

14.Student Quiz Attempt

Field Name	Datatype	Size	Constraints	Sample Value	Description
Attempt_ID	INT	5	PRIMARY KEY	3001	Unique attempt ID
Quiz_ID	INT	5	FOREIGN KEY	701	Quiz reference
Student_ID	INT	5	FOREIGN KEY	201	Student reference
Start_Time	DATETIME	--	NOT NULL	2026-04-12 10:00:00	Quiz start time
End_Time	DATETIME	--	--	2026-04-12 10:30:00	Quiz end time
Score	INT	5	--	42	Total score

15. Student Answers

Field Name	Datatype	Size	Constraints	Sample Value	Description
Answer_ID	INT	5	PRIMARY KEY	4001	Unique answer ID
Attempt_ID	INT	5	FOREIGN KEY	3001	Attempt reference
Question_ID	INT	5	FOREIGN KEY	1001	Question reference
Selected_Option	INT	5	FOREIGN KEY	2001	Selected option ID
Answer_Text	TEXT	--	--	NULL	For descriptive answers
Is_Correct	BOOLEAN	--	--	TRUE	Correct or not
Marks_Obtained	INT	3	--	5	Marks scored per question

16.Quiz Results

Field Name	Datatype	Size	Constraints	Sample Value	Description
Result_ID	INT	5	PRIMARY KEY	801	Unique result ID
Quiz_ID	INT	5	FOREIG N KEY	701	Quiz reference
Student_ID	INT	5	FOREIG N KEY	201	Student reference
Total_Questions	INT	3	NOT NULL	10	Total questions
Correct_Answers	INT	3	--	8	Number of correct answers
Marks_Obtained	INT	5	NOT NULL	42	Final score
Result_Date	DATE	--	--	2026-04-12	Result date

GUI DESIGN (MOCK SCREENS)

1. ADMIN LOGIN

The mockup shows a web interface for the 'Admin Login' page. At the top, there is a blue header with the 'CampusCore' logo, which includes a graduation cap icon and the tagline 'Connecting Campus Life'. Below the header, the title 'Admin Login' is centered. The login form consists of two input fields: 'Email' with the placeholder text 'Enter your email' and 'Password' with the placeholder text 'Enter your password'. Below these fields is a checkbox labeled 'Remember Me'. A blue 'Login' button is positioned below the checkbox. At the bottom of the form, there is a footer area with the copyright notice '© 2026 CampusCore. All rights reserved.' on the left and 'Admin Access Only' on the right.

MIS REPORTS DESIGN

Management Information System (MIS) Reports provide administrators and stakeholders with actionable data insights derived from the TrueHire platform. These reports are designed to support data-driven decision-making for recruiters, management, and platform administrators.

- **ADMIN MIS REPORTS**

1. User Management Report

Month	Total Users	Admins	Teachers	Students	Active Users	Inactive Users	New Registrations
January	850	5	45	800	720	130	200
February	1,050	5	52	993	910	140	220
March	1,320	6	60	1,254	1,150	170	270

2. User Activity Report

Month	Avg Daily Logins	Login Frequency	Inactive Accounts	Suspicious Accounts
January	300	3/week	130	5
February	420	4/week	140	3
March	580	5/week	170	2

3. Data Upload Report

Month	Students Added	Teachers Added	Upload Entries
January	200	7	250
February	190	5	310
March	260	8	420

4. Account Status Report

Month	Activated	Deactivated	Pending Approvals
January	780	40	30
February	980	50	20
March	1,250	60	10

5. Digital ID Generation Report

Month	IDs Generated	Pending IDs	Downloads
January	700	150	500
February	920	130	780
March	1,180	140	1,020

6. System Configuration Report

Month	System Changes	Admin Logs	Audit Issues
January	8	120	3
February	5	150	2
March	6	180	1

7. Analytics & Performance Report

Month	Total Usage (hrs)	Peak Time	Quiz Usage	Assignment Usage	Study Usage	Material
January	2,500	6–8 PM	40%	35%	25%	
February	3,400	5–9 PM	45%	38%	17%	
March	4,800	4–9 PM	50%	40%	10%	

1. TEACHER MIS REPORTS

1. Student Enrolment Report

Month	Total Students	New Students	Subjects Covered
January	800	200	6
February	993	190	7
March	1,254	260	8

2. Study Material Report

Month	Materials Uploaded	Downloads	Most Active Subject
January	120	900	Science
February	160	1,400	Math
March	210	2,100	Science

3. Quiz Report

Month	Quizzes Created	Attempted	Not Attempted	Avg Score
January	30	600	200	65%
February	45	850	143	68%
March	60	1,100	154	72%

4. Assignment Report

Month	Assignments Given	Submissions	Pending	Late Submissions
January	25	580	220	50
February	35	820	173	45
March	50	1,050	204	40

5. Evaluation Report

Month	Avg Performance	Top Performers	Low Performers
January	64%	80	120
February	67%	110	100
March	71%	140	90

6. Attendance Report (Teacher View)

Month	Daily Avg	Monthly Avg	Absentees
January	72%	75%	220
February	78%	80%	180
March	85%	86%	150

STUDENT MIS REPORTS

1. Login & Activity Report

Month	Avg Login Time	Total Logins	Active Students
January	45 min	9,000	700
February	55 min	12,500	880
March	70 min	17,000	1,120

2. Study Material Usage

Month	Materials Accessed	Downloads	Top Topic
January	1,200	900	Algebra
February	1,800	1,400	Physics
March	2,600	2,100	Chemistry

3. Assignment Report (Student)

Month	Submitted	Pending	Avg Grade
January	580	220	66%
February	820	173	69%
March	1,050	204	73%

4. Quiz Performance

Month	Attempts	Avg Score	Pass %
January	600	65%	70%
February	850	68%	75%
March	1,100	72%	82%

5. Result Report

Month	Avg Marks	Top Rankers	Pass Rate
January	64%	50	72%
February	67%	75	78%
March	71%	100	85%

6. Rewards & Achievements

Month	Badges	Reward Points	Certificates
January	300	5,000	120
February	450	8,000	180
March	700	12,000	250

7. Attendance Report (Student)

Month	Daily Avg	Monthly %	Eligible Students
January	72%	75%	600
February	78%	80%	780
March	85%	86%	1,020

CONCLUSION

The features of CampusCore together form a powerful and well-integrated academic management system that effectively addresses the challenges of traditional campus operations. By bringing all essential academic functionalities such as study material management, assignment handling, quiz conduction, attendance tracking, and performance analysis into a single platform, the system ensures better organization and accessibility of information.

One of the key strengths of CampusCore is its ability to centralize data and processes, which significantly reduces redundancy, minimizes errors, and saves valuable time for both teachers and students. The digital approach eliminates the need for manual paperwork and allows users to perform tasks quickly and efficiently from any location.

The inclusion of interactive features such as online quizzes with instant results, reward points, and leaderboard systems not only enhances student engagement but also promotes a competitive and motivating learning environment. These features encourage students to actively participate in academic activities and continuously improve their performance.

Moreover, the system supports effective communication through timely notifications and updates, ensuring that students and teachers remain well-informed about important events, deadlines, and academic activities. The role-based access control mechanism further strengthens the system by maintaining data security and ensuring that users can only access relevant functionalities.

The performance analysis and reporting features provide valuable insights into student progress, enabling teachers to identify strengths and weaknesses and take appropriate actions to improve learning outcomes. Additionally, the digital ID card generation and user-friendly interface contribute to the overall convenience and usability of the system.

In conclusion, the features of CampusCore not only simplify academic management but also enhance the quality of education by making the learning process more interactive, transparent, and efficient. The system represents a modern and scalable solution that can adapt to the evolving needs of educational institutions and supports the vision of a smart digital campus.
